

### Generation Resource Mix

A comparison between the sources of generation used to produce this product and the historic regional average.

### Environmental Characteristics

A description of the characteristics associated with each possible generation resource.

Biomass Power	Air Emissions and Solid Waste
Coal Power	Air Emissions and Solid Waste
Hydro Power	Wildlife Impacts
Natural Gas Power	Air Emissions and Solid Waste
Nuclear Power	Radioactive Waste
Oil Power	Air Emissions and Solid Waste
Other Sources	Unknown Impacts
Solar Power	No Significant Impacts
Unknown Purchased Resources	Unknown Impacts
Wind Power	Wildlife Impacts

### Air Emissions

Product-specific projected and actual air emissions for this period compared to the regional average air emissions.

### Radioactive Waste

Product-specific projected and actual radioactive waste for this period.

TYPE	PROJECTED QUANTITY	Unit
High-Level Radioactive Waste	0	Lbs./1,000 kWh
Low-Level Radioactive Waste	0	Ft <sup>3</sup> /1,000 kWh

Note: The generation of this product involves the use of 14% of Unspecified Purchased Resources. The air emissions and radioactive waste associated with these unknown resources are not included in these charts.

With in-depth analysis, the environmental characteristics of any form of electric generation will reveal benefits as well as costs. For further information, contact Dominion Retail at <http://retail.dom.com> (keyword: Duke) or by phone, toll free at 1-866-645-9809.
